EDUCATION

Swarnandhra College of Engineering and Technology

B.Tech in Computer Science Engineering; GPA: 8.82

Narsapur, India

June 2022 – June 2026

SKILLS SUMMARY

Languages: Python (OOP, scripting), SQL

Frameworks & Libraries: Flask (REST APIs), TensorFlow, Keras, Pandas, NumPy, OpenCV, Scikit-Learn

Tools: Git, Jupyter Notebook, Postman, Power BI, Excel, PowerPoint, Tableau

Concepts: Machine Learning, Predictive Analytics, NLP, ETL Pipelines, Feature Engineering, Data Modeling

Soft Skills: Data Visualization, Storytelling, Stakeholder Communication, Agile, Problem Solving

WORK EXPERIENCE

Python Developer Intern | Blackbuck Engineers

Jan 2025 – Apr 2025

- Designed modular Python ETL pipelines using OOP principles, improving data processing efficiency by 25%.
- Built and deployed ML inference APIs using Flask, delivering end-to-end data science solutions.
- Performed feature engineering and model performance analysis to support iterative ML improvements.
- Collaborated with cross-functional teams in agile environment; maintained clean code through reviews.
- Debugged data preprocessing and model inference pipelines, increasing reliability and efficiency.

Data Analyst (Virtual Simulation) | Deloitte

Feb 2026 – Mar 2026

- Analyzed large datasets using Python and SQL (joins/aggregations) to extract actionable business insights.
- Built interactive Power BI dashboards for data-driven decision-making and stakeholder reporting.
- Cleaned and validated datasets using statistical techniques; documented processes for team reference.

PROJECTS

Deepfake Image Detection System | Python · TensorFlow · EfficientNet · Flask · OpenCV

Mar 2026 – May 2025

- Engineered end-to-end deep learning pipeline — data collection, preprocessing, model training, API deployment.
- Applied MTCNN face extraction and EfficientNet transfer learning on labeled real/fake dataset.
- Deployed predictive model as Flask REST API; evaluated with accuracy, precision, recall, and F1-score.
- Maintained modular OOP Python codebase with clear separation across data, model, and API layers.

Sales Performance Dashboard | Python · Power BI · DAX · Power Query

Jan 2025 – Feb 2025

- Built analytics dashboard analyzing revenue, profit, and regional trends across 9,800+ records.
- Created DAX measures for Total Sales, Profit Margin, MoM growth; used Power Query for transformation.

CERTIFICATIONS

Python & SQL Certification | Simplilearn

2025

- Gained strong Python programming and SQL skills for data analytics and large dataset manipulation.
- Built scripts for data collection, transformation, and validation to support end-to-end data projects.

AI/ML Engineering Intern Certificate | Blackbuck Engineers

2025

- Applied ML algorithms and predictive analytics models to extract insights and drive data-driven decisions.
- Developed automated ETL and model inference solutions to streamline data science operations.

Google Data Analytics Professional Certificate | Coursera

2026

- Built skills in statistical analysis, data visualization, and storytelling for management stakeholders.
- Gained experience in process automation using Python, SQL, Power BI dashboards, and reporting tools.
