PROFESSIONAL SUMMARY

Recent Graduate Computer Science student with hands-on experience in full-stack development, REST API design, and backend engineering using Python, Flask, Node.js, and React. Delivered production-grade web applications and ML inference APIs during a 3-month industry internship at BlackBucks. Proficient in component-based frontend architecture, responsive UI development, and end-to-end application delivery aligned with agile workflows.

TECHNICAL SKILLS

Languages: Python (OOP, scripting), JavaScript, SQL, HTML, CSS
Frontend: React.js, Responsive Web Design, Component-based Architecture, Templating Engines
Backend: Node.js, Express.js, Flask (REST APIs), ETL Pipelines, Data Modeling
Databases: MongoDB, SQLite, MySQL (Relational), ChromaDB / FAISS (Vector)
AI / ML: TensorFlow, Keras, Scikit-Learn, LLMs, RAG Pipelines, NLP, MLOps
Cloud & Tools: AWS (basics), Docker (basics), Git, Power BI, Tableau, Postman, Jupyter
Practices: Agile, Test-Driven Development, Code Reviews, Stakeholder Communication

PROJECTS

Online Complaint Management Platform Jan 2025 – Apr 2025

MongoDB · Express.js · React.js · Node.js (MERN)

- Built a full-stack complaint platform using MERN stack with a responsive, component-based React UI.
- Developed Node.js/Express REST APIs for complaint tracking and role-based access; sub-200ms response time.
- Designed MongoDB schemas supporting 500+ records with real-time status tracking and persistence.
- Reduced manual complaint handling time by 60% through responsive cross-device UI design.

Service Request Management System Jan 2026 – Apr 2026

Python · Flask · HTML · CSS · JavaScript · SQLite

- Built a Flask REST API web app to manage and resolve service requests, cutting handling time by 60%.
- Implemented role-based access, real-time tracking, and SQLite persistence for 500+ records; sub-200ms APIs.
- Developed responsive frontend with HTML, CSS, and JavaScript for seamless cross-device usability.

Deepfake Image Detection System Mar 2026 – May 2026

Python · TensorFlow · EfficientNet · Flask · OpenCV · LLM

- Engineered end-to-end MLOps pipeline (data, training, Flask API deployment), cutting inference time by 40%.
- Achieved 93% accuracy (F1: 0.91) using EfficientNet transfer learning on 10,000+ labeled images.
- Integrated RAG-style LLM explainability layer, improving model interpretability by 30%.

WORK EXPERIENCE

AI/ML Engineering Intern Jan 2025 – Apr 2025

BlackBucks Remote, India

- Deployed Flask REST APIs for ML inference, serving scalable backend services for data science workflows.
- Built modular ETL pipelines using OOP, improving data processing efficiency by 25%.
- Performed feature engineering and model performance analysis in an agile team environment.
- Debugged inference pipelines and improved reliability through peer code reviews.

Data Analyst (Virtual Simulation) Feb 2026 – Mar 2026

Deloitte Remote

- Analyzed datasets using Python and SQL; built interactive Power BI dashboards for stakeholder reporting.
- Cleaned and validated data using statistical techniques; documented ETL processes for cross-functional teams.

EDUCATION

B.Tech in Computer Science Engineering Jun 2022 – May 2026

Swarnandhra College of Engineering and Technology, Narsapur, India GPA: 8.82/10

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera, 2026
- AI/ML Engineering Intern Certificate – Blackbuck Engineers, 2025
- Full Stack Developer(MERN) – Smartbridge, 2025
