PROFESSIONAL SUMMARY

Final-year CSE student with hands-on experience across two internships spanning full SDLC, test automation, REST API validation, and Agile delivery. Proficient in Python, Java, SQL, and JavaScript with practical exposure to Git, JIRA, and full stack development (Flask, PostgreSQL). Adept at designing structured test cases, identifying defects, and collaborating with cross-functional teams. Seeking to contribute a quality-first mindset at EY GDS Consulting.

TECHNICAL SKILLS

Languages:	Python, JavaScript, SQL
Frameworks:	Flask, REST APIs, PostgreSQL, MySQL, HTML5, CSS3, Client-Server Architecture
Testing:	Unit, Integration, Regression, Functional Testing, UAT, Test Case Design & Execution
Tools:	Git, GitHub, VS Code
Methodology:	SDLC, Agile/Scrum, OOP, Data Structures & Algorithms, Code Review, Documentation

INTERNSHIP EXPERIENCE

AI/ML Intern | Blackbuck Engineers

Jan 2025 – Apr 2025

- Participated across all SDLC phases for Python automation and ML inference services; authored and executed 50+ structured test cases covering unit, integration, and regression scenarios.
- Developed and validated Flask microservices using pytest-driven automated test workflows, reducing debugging turnaround by 35% and accelerating Agile sprint delivery velocity.
- Leveraged Git for branching, merging, and code check-in; collaborated via structured code reviews and maintained audit-ready documentation per Agile project standards.

Data Analyst — Deloitte (Job Simulation)

Feb 2026 – Mar 2026

- Completed a virtual data analyst simulation focused on data cleaning, validation, and reporting for business stakeholders.
- Analyzed large datasets in Excel using advanced functions (VLOOKUP, PivotTables, conditional formatting) to uncover trends.
- Created summary dashboards and distributed reports to internal teams, simulating real-world stakeholder communication workflows.
- Identified data quality issues and proposed process improvements to enhance reporting accuracy and operational efficiency.

PROJECTS

Service Request Management System | Python · Flask · REST APIs · PostgreSQL

- Architected and tested a RESTful service platform handling 500+ simulated requests; SLA-based priority tracking reduced manual overhead by 40% and improved retrieval speed by 30%.
- Implemented structured input validation, automated reporting, and peer code reviews; delivered production-grade codebase following Agile sprint practices and SDLC best practices.

REST API Test Automation Framework | Python · Pytest · Postman · Flask · PostgreSQL

- Engineered a pytest-based automation suite covering 80+ test cases for CRUD operations, SQL validation, and regression with Postman collections for parallel manual validation.
- Detected 15+ defects across response codes, data integrity, and performance benchmarks; drove fix-verify cycles reducing MTTR and ensuring zero regression across releases.

Deepfake & AI Image Detection | Python · CNN · TensorFlow · OpenCV · Flask

- Built a deep learning pipeline using CNNs and transfer learning (EfficientNet) to classify real vs. AI-generated images, achieving 91% validation accuracy on a 10,000-image dataset.
- Exposed model via a Flask REST API with structured input validation and pytest coverage; documented inference metrics and test results following Agile sprint documentation standards.

EDUCATION

B.Tech — Computer Science Engineering

2022 – 2026 | CGPA: 8.76 / 10

Swarnandhra College of Engineering & Technology

Coursework: DSA, OS, DBMS, Computer Networks, OOP, Software Engineering, Web Technologies

CERTIFICATIONS

AIML Intern Certification — Blackbuck Engineers (2025)

SQL for Data Science — Simplilearn (2025)

Full Stack Web Development — SmartBridge (2025)

Data Scientist Certification — CodecTechnologies (2026)
