OBJECTIVE

Detail-oriented Computer Science undergraduate seeking a Data Capture and AI Research role involving wearable and hand-mounted camera devices. Experienced in following precise protocols, logging structured data, maintaining data quality standards, and collaborating with AI and research teams. Comfortable performing repetitive scenario-based tasks with consistency, accuracy, and attention to detail.

KEY SKILLS

Data Capture & Logging: Wearable/camera device operation, task logging, movement and gesture documentation, data quality control
Field Operations: Structured and unstructured task execution, outdoor/indoor scenario work, usability and data collection experience
AI & Research Collaboration: Working with ML/AI pipelines, real-time inference systems, feedback loops with research teams
Technical: Python, SQL, TensorFlow, OpenCV, Pandas, NumPy, Power BI, Tableau, Excel, AWS, GCP, Flask, Git

EXPERIENCE

AI/ML Engineering Intern | Blackbuck Engineers

Jan 2025 - Apr 2025

- Built Python ETL pipelines ensuring data quality and consistency across large datasets, improving efficiency by 25%.
- Validated and documented ML model performance metrics — mirrors structured task logging in data capture workflows.
- Developed Flask REST APIs for real-time model inference, demonstrating experience in AI/ML team collaboration.
- Maintained detailed processing logs and followed data documentation protocols throughout the internship.

Data Analyst (Virtual Simulation) | Deloitte

Jan 2025 - Feb 2025

- Performed structured EDA on large datasets ensuring accuracy and completeness — aligned with capture quality standards.
- Executed SQL joins and aggregations to extract insights; designed interactive dashboards for business decision-making.
- Cleaned and validated diverse datasets using Excel and statistical techniques, ensuring data integrity throughout.

PROJECTS

Superstore Data Analysis and Dashboard

Excel | Pivot Tables | KPI Cards | Slicers

- Analyzed 9,800+ sales records using Pivot Tables, KPI Cards, and dynamic Slicers to surface business trends.
- Identified top regions, peak months, and purchasing patterns — demonstrates systematic observation and structured reporting.
- Designed a one-page professional dashboard with dynamic filters to support data-driven decision-making.

Sign Gesture Recognition System

Python | TensorFlow | OpenCV | Flask | GCP

- Processed and labeled 6,000+ hand gesture images, directly paralleling hand-movement data capture and cataloguing tasks.
- Built CNN model achieving 92% accuracy for real-time gesture recognition; deployed via REST API on GCP.
- Demonstrates expertise in camera-based visual capture, data preprocessing, and AI research deployment workflows.

EDUCATION

B.Tech in Computer Science Engineering | Swarnandhra College of Engineering and Technology 2022 - 2026

CGPA: 8.76 / 10

CERTIFICATIONS

AIML Engineering Intern - Blackbuck Engineers (2025) | Data Analyst Simulation - Deloitte (2026) | SQL - Simplilearn (2025) | Data Science Intern - CodecTechnology (2026)

ADDITIONAL INFORMATION

Physical Readiness: Comfortable wearing camera/wearable equipment for extended durations; good mobility and hand-eye coordination

Task Execution: Proven ability to follow detailed protocols precisely, maintain consistency in repetitive tasks, and document all observations accurately

Equipment Familiarity: Experienced with smartphones, wearable devices, video recording tools, and REST API-based real-time data systems

Availability: Flexible with shift timings; willing to work in varied indoor/outdoor environments including offices, warehouses, schools, and retail spaces
